

Automated Node.js Application Deployment

GitHub Link: <https://github.com/MohamedKhaledOCT/X-o-Game-Pipeline>

Summary:

Implemented a robust CI/CD pipeline to manage the deployment of a Node.js application.
Continuous Integration (CI):

Utilized Jenkins to automate the build and test phases, ensuring high code quality and integration with Docker Hub for seamless image management. Jenkins fetched the latest code from GitHub, installed dependencies, ran unit tests, and created Docker images.

Continuous Delivery (CD):

Leveraged ArgoCD to automate the deployment process. ArgoCD monitored changes in the GitHub repository and synchronized them with the Kubernetes cluster, ensuring rapid and reliable delivery of new features.
